## PRESS RELEASE

FOR IMMEDIATE RELEASE

Contact: Jennifer Stattelmann

Office: 785-234-1572

### **Prometheus, Inc. offering disaster recovery services including secure off-site and out of region data protection.**

Topeka, KS January 23, 2006 – In today's world, computer generated data is a company's life-blood. If it is lost it could mean your company becomes another statistic on the "ceased trading" list. Statistics show that up to 80% of a company's data may reside on local disks on user desktops and laptops. Often, this data is never backed up!

Prometheus, Inc., a Topeka based company, is providing to their customers off-site and out of region data disaster recovery protection. The service is based on a platform also used by Compaq on-line services and adopted by Siemens Pyramid. Prometheus, Inc. provides an elegant software solution to resolve the problem. Working over any TCP/IP network, users can back up or restore their data over the network, the corporate Intranet or from a direct Internet connection anywhere in the world. More importantly, the software is easily configured and administered. All events are logged on the server.

Prometheus, Inc. uses Windows NT/2000/2003/XP services to schedule user requests and provides detailed logging of all user Backup Operations. User selectable DES, TRIPLE DES or Blowfish encryption algorithms provide security. All communications between the server and client is encrypted as well as the user data, filenames, user password and user ID. Data is stored in Prometheus, Inc. facilities located in St. Louis, MO providing protection from all forms of possible disasters.

Prometheus, Inc. is a 'total solution provider' offering expert data network consulting, design, implementation and maintenance. Prometheus, Inc. provides a wide range of services from disaster recovery to supplemental staffing, from network and security monitoring to end user helpdesk support. For further information, contact Prometheus, Inc. at 877-700-1447 or on the web at [www.prometheusinc.net](http://www.prometheusinc.net).
